Junk food is part of almost every person's diet. The habit has become so severe that even thinking of kicking it seems tough. Aggressive advertising, low cost, and mouth-watering taste are some of the reasons that have prompted it to become popular; thus, it is hard to resist temptation.

Junk food makes you addicted to unhealthy diet patterns. Besides, it activates various diseases as diabetes and heart ailments, mainly if you do not exercise and have a family history of such illnesses. It can also release some kind of fats that are likely to increase your cholesterol levels.

Lethargy is another effect of eating such food. When gorging processed food, your energy levels decrease. The reason behind this process is that snack food contains high amounts of carbohydrates that prickle your blood sugar levels. When this happens, you feel tired and less alert.

If you are under these eating habits, you had better be strict on yourself, follow a healthy diet, and exercise. Never stop your efforts until you succeed.

A) Comprehension **(08 pts)**

Read the text carefully and do the activities.

Human smuggling is one of the world's oldest professions. When nations established borders, they sought to regulate traffic across **them**. However, this led to the creation of markets for the smuggling of humans and goods. Human smuggling involves illegal immigration, transnational criminal networks and trafficking in humans to exploit them. It is associated with many other social problems: sweatshops, fraudulent documents and corruption.

Human smuggling takes many different forms. At the most informal levels, foreigners are helped by family and friends to traverse the border sometimes packed into small unventilated spaces. At a slightly more organised level, local agents may be used to link migrants to more formal smuggling operations including forging documents, border crossing cards and visas. The migrants agree to be moved and the smuggler accepts to receive full payment when they reach the final destination.

Smuggled migrants sometimes flee violence in their home country; **others** simply seek better lives, economic opportunities or reunification with family members abroad.

Combating human smuggling requires understanding **its** nature. Indeed, public authorities must deal with a wide range of related matters: human rights, protection of victims and labour regulations.
